DRISHTI RAI

DATA SCIENCE ENGINEER

PROJECTS

Outlay App: Search Before You Spend
It provides the advantage of online shopping in offline mode. You can see products, their prices at nearby shops and access their location.

BiblioManiac App: Barter is Back
It helps users to exchange books, connect with people of similar taste and explore books without giving thought to price. This is an effort to bring physical books in use which was reduced due to online free pdfs available.

Ikshana App: Your Vision, Our Focus
It is an associate degree app, tailored for that working-from-home, play fans, students, lecturers, and phone addicts. Through Ikshana, we tend to aim at providing you, customized eye protection or the other issue or answer associated with the user's sight, helping you to require higher care of them,

Notify Me : Realtime CoronaVirus Outbreak Notification System using Python.
NotifyMe will give you the real-time update about the number of new cases, deaths, and the recovered cases of coronavirus according to time (after 1 hour or 2 hours) within a state. It will also provide information about how many of them are Indian national and foreign nationals.

ABOUT ME

Currently Pursuing Second Year B.Tech in the field of Computer Science with specialization in Data Science from Bennett University. I'm very much good at developing apps and website. Recently won the InnoApp Competition and secure the position of best UI/UX of an app.
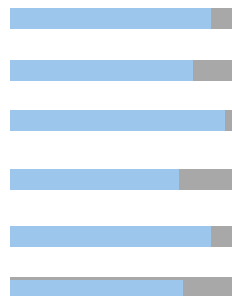

My Skillset

I have a keen eye for detail, which I employ to spot even the tiniest flaws in code. I operate effectively under duress and can deliver high-quality results in a short amount of time. I work with a wide range of people and have great interpersonal skills. In terms of programming languages, I currently use Java, Python, Go, HTML, CSS, and SQL, and I'm continuously looking for new and better programming languages to broaden my horizons.

My Goals

I'm seeking for a chance to work with a team that values open and honest communication. I want to work for a firm that I believe in and where I can make a difference. I am constantly eager to learn new things and am willing to take on hard projects.
One of my life's ambitions is to raise the bar for Indian technology by developing ultra-efficient software that cannot be found anyplace else.

SKILLS

- Python
- C++
- Problem Solving
- Java
- Android Studio
- HTML/CSS

PROFESSIONAL SKILLS

- Installation and Debugging
- Team Work
- Social
- Problem Solving
- Computer Programming
